## EXPERIENCE

**SymphonyAI,** Bangalore
— *Software Engineer*

February 2025 - Present

**TechConative,** Chennai
— *Software Engineer*

March 2024 - February 2025

**GDNA, Aditya Birla Group,** Bangalore
— Associate *Product Engineer*

November 2022 - February 2024

**CG-VAK Software and Exports,** Coimbatore
— *Software Engineer*

September 2020 - November 2022

## SKILLS

React

React Native

Micro-frontends

Ionic

Angular

Figma

Tailwind CSS

Material UI

Webpack

## RESPONSIBILITIES

- **Led Frontend Architecture**: Worked on micro-frontend architecture using React and Webpack, setting up the front end for a media management platform. Developed and published a reusable library for micro-frontend projects to internal repositories, streamlining adoption.

- **React and Ecosystem Expertise**: Built and maintained 10+ web projects using React, leveraging tools like React Query, Material-UI, and Highcharts to deliver efficient and user-friendly applications. Customized Highcharts components, bundled them with Rollup, and published them for organizational reuse.

- **Implemented Development Best Practices**: Integrated tools such as commitlint, Husky, Prettier, and ESLint to enforce coding standards and ensure code quality across projects.

## LANGUAGES

English

Tamil

- **Diverse Platform Experience**: Worked on platforms like media management systems, AI-powered applications for decision-making and alerts, analytics platforms, and mobile applications.

- **Mobile and UI Design Proficiency**: Contributed to 3+ React Native projects, including one with 500k+ downloads, and designed UI for 3+ projects in Figma, focusing on visually appealing and functional designs.

## AWARDS & RECOGNITION

- Received the GDNA Genius award for innovatively developing the canvas model and facilitating the transmission of image coordinates to the backend.

## EDUCATION

**Sri Krishna Adithya College Of Arts and Science,** Coimbatore— *B.Sc Information Technology*

June 2017 - April 2020

**Bharathiar University,** Coimbatore— *M.Sc Information Technology*

June 2021 - June 2023

## PROJECTS

**Platforms for Data Science Models - Figma, React, Redux**

Designed and developed platforms for data science models, employing Figma, React, and Redux Toolkit. Created controls to interact with backend models, presenting data results through tables and graphs. Adhered to React best practices and effective state management.

**Ayevee - A lifestyle App. - React Native.**

Developed Ayevee, a React Native lifestyle app with 500k+ downloads. This social media platform showcases star performers, influencers, and anchors, covering lifestyle, beauty, travel, gender, entertainment, sports, and more.
